Summary

The City of Milpitas owns and operates its own water utility. The northern and eastern areas are supplied primarily by the SFPUC, while the remaining areas are supplied by SCVWD. With few exceptions, residents receive SFPUC water, while industrial and commercial areas receive SCVWD water. The City does not blend SFPUC and SCVWD waters under normal operations, but they can be blended during emergency situations.

The City's distribution system consists of 5 turnouts, 9 pressure regulator valves, 4 emergency pressure regulator valves, 5 pumping stations, 5 storage tanks, and 1 well.

The City has emergency interties with ACWD to the north and SJWC to the south. The City has one well, Pinewood Well, which can provide water to one SFPUC-supplied zone during emergencies. Another well is under construction to supplement water supply during emergencies.

Since 1997, the City has been receiving non-potable recycled water from SBWR.
