

BAWSCA Strategy Phase II A Final Report

July 3, 2012 Report; Revisions July 30, 2012

Errata

This Phase II A Final Report was completed and reviewed by the BAWSCA member agencies. Changes and updates incorporated into the final version of this report include the following which are shown in the version dated July 30, 2012:

- Section 2: Text was added to the beginning of Section 2 after the 1st paragraph and bullets that reads “Additional detailed information on the demand projections and drought allocation calculations is provided in *Attachment 1*.”
- Section 3: The data for SFPUC Retail Demand in Table 3-2 – Three Different Demand Scenarios Used to Examine Frequency and Magnitude of SFPUC Supply Shortfalls Using SFPUC Hydrologic Model was corrected. Retail Demand numbers for the Minimum Demand (FY 2009-10), Intermediate Demand (Projected 2025), and Maximum Demand (Projected 2035) scenarios (68.4, 74.7 and 81.0 mgd, respectively) were updated to 75.5, 76.2, and 78.7 mgd, respectively. These edits were also made to the text.
- Section 4: Text in 4.4.3.2 for description of Ken Coverdell project replaced with language requested by Mr. Coverdell.
- Section 7: Table 7-1 updated to correct data in wrong columns.
